3 Marlin Drive _____
Pittsburg, California 94565 _____

STATE OF CALIFORNIA
State Energy Resources
Conservation and Development Commission

In the Matter of:)	
)	Docket No. 98-AFC-1c
Application for Certification for the)	Request to Become Intervenor
Los Medonas Power Plant 98-AFC-1c)	From: <u>Joe P. Hawkins</u>
)	<u>Concerned Citizen Effected</u>
_____)	<u>In Air Basin</u>

I Joe P. Hawkins Request to be intervenor as a member of the concerned public. I do so under duress as this is the only way that I may participate in this process in a somewhat meaningful way. I feel that this infringes on my rights as a Individual and Citizen and discriminates on my standing as such in this local air basin. I do not have the money for a high powered attorney and I myself am not one, thus, giving me a total disadvantage from the very beginning of this process. I am not a competing power company and should not have to be held in the same standards as one to have my information I present heard and used in evaluating the decision of whether or not this is right and expectable to put more pollution in this area. Which has been the case in previous AFC's.

I know from past experience with this Commission that it does not really care in the least about the people in the effected area and does not listen to anyone else even if the information presented comes from itself and other government agencies concerned with the air and water in this area and the US as a whole. Nor if it comes from the News Media after their investigations.

I still consider this a rogue agency and will up front say so. I also am putting it on notice that my time schedule is from the noon time up to a decent hour. I am chemically sensitive and can not tolerate chemicals and perfumes and etc.... in the room or area outside I am in for any length of time and I have a fatigue that gets worse as time goes on. My time concentration level is at maximum a couple hours due to my chemical related injury.

I am forced to live at low income poverty level and request assistance in any copies that have to be submitted to others involved in this process. I also request financial aid in paying for my experts for testimony and for a lawyer of my choosing. So as to have a more level playing field here. I also request that I be able to call in for any hearings or conferences that are not in my area, and for the ones in my area that they be held in a chemical free environment or as close to chemical free as possible. They all must be in the Afternoon times for my participation.

I request this on the grounds of the ADA (Americans Disability Act). I also request so as a concerned citizen who has no other means to participate in this process on a equal setting as that of the power plants and their lawyers and experts.

Up front I do not feel the CEC nor the BAAQMD nor CARB nor EPA Region IV fully represents the people in any of these issues here and is more inclined to side with the Power Plants as they have in the past. Especially when it comes to Poor and Minority and the Delta itself.

I also request all data, correspondences, and studies by all the agencies involved in the Los Medonas Power Plant 98-AFC-1c. Also any relevant information. That I do not have as of yet.

I request that all the information they submitted be put in simple terms so that the public and even a 8th grader can understand rather than chemistry equations and scientific jargon that the public can not follow or understand. Including myself. I request that they also provide simplified graphs and so forth. As being a previous intervenor this application is far more difficult to understand. Which shows that this is another sign of how little anyone wants the public to really be involved in this process.

Request that all my documents be handled by e-mail and posted in HTML format. I also request that all documents concerning this 98-AFC-1c be posted in a editable format. If not then I request that I be supplied with a software program, (The full version of Adobe Illustrator, which ever version is being used in this process.), that makes it editable so that I may be able to cut and paste and save on time when quoting other documents concerning this case. If not then I would like them sent to me in a format that I can handle which would be Microsoft Office 95 formats. As I do not have the capability to cut and paste PDF formats and I also do not have legal secretaries and so forth to do so for me. Nor the money to purchase these programs or the secretaries. As a participant I want the ability to cut and paste when I refer to certain parts of this application and documents and etc.. If not then put them on CDRW or CDR and send them to me in the document format of MS Word 6.0 or 95. This is not being unreasonable in asking that they are in a HTML format though so it will save us all a lot of time and I know you have the capability to change their format into such as I have already seen it in that format on your web site.

Also I need Paper and Ink for my printer so as to carry hard copies of all documents to Work Shops and meetings when needed. I use LCO2BK black ink for Brother MFC-7150C. I also need Normal Ink Jet printer paper, 90 to 94 Bright, as this is easier for me to see when my eyes are fatigued. Otherwise I request that you send me also all hard copies with this bright a paper. This is also due to my chemical injury and it's resulting side effects. I will let you know later if I forgot anything else.

Last but not least. I protest this added pollution they are requesting on top of this already over burdened Minority/Poor Population Of the City of Pittsburg as a whole. This is a Environmental Justice Nightmare gone crazy. That they would even request additional Pollution allowances is Ludicrous to say the least. Neither of the two already approved Power Plants should have even been allowed in this population. Much less having a greedy manipulating power hungry industry push its self in secrecy on this Population as has already happened. It is a legal shame!!!
